DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 17-24 are rejected under 35 U.S.C. 102(b) as being anticipated by Yang (US 6459906).

Regarding claims 17-24, Yang discloses a method for remotely monitoring a residence comprising: generating a trigger initialized digital image in a surveillance device; transmitting a trigger alert signal directly to a wireless communication device over a private network; and enabling an image transmission between said surveillance device and said cell phone regardless of a service provider of said wireless communication device. Yang also discloses transmitting a trigger alert signal over a private network comprises: transmitting said trigger alert signal from said surveillance device to a telephone exchange over a standard telephone line; transmitting said trigger alert signal from said telephone exchange to a mobile telecommunications switching office; and transmitting said trigger alert signal from said mobile telecommunications switching office to said wireless communication device over a radio frequency (RF) network. Yang also discloses that the trigger initialized digital image is generated in response to an input received from a sensor, wherein said sensor comprises one of an optical sensor, an infrared sensor, an ultraviolet sensor, an open circuit sensor, or a closed circuit sensor. See col. 2, lines 12-34, col. 3, lines 14-44, col. 4, lines 15-31 and col. 5, lines 17-45.
